Naming Conventions

images Folder

✓ A subfolder named **images** is required.

styles Folder

✓ A subfolder named **styles** is required.

Files

✓ All file names follow the course's naming conventions.

HTML Document

W3C HTML Validation

✓ No HTML validation errors were found. Use the link below to check for warnings or other useful information.
[HTML Validation Service Report on w3.org](https://html-validation-service.github.io/)

doctype

✓ An HTML5 doctype is required and is the first line of the document.

<html>

✓ An all enclosing **<html>** element is required and a **lang** attribute must be applied to the opening **<html>** tag.

<head>

✓ An enclosing **<head>** element (with opening and closing tags) must exist inside the **<html>** element and must come before the **<body>** element.

<body>

✓ An enclosing **<body>** element (with opening and closing tags) must exist inside the **<html>** element, appear after the **</head>**, and before the **</html>** closing tag.

lowercase HTML tags

✓ It is best practice to use lowercase for all HTML tags.

HTML attribute spacing

✓ It is best practice to have no spaces around the equal sign in attributes, e.g., **<html lang="en-US">**

<head> Elements

Meta Charset

✓ The meta charset attribute must be properly declared.
<meta charset="UTF-8">

Meta Viewport

✓ The meta viewport attribute must be properly declared.
<meta name="viewport" content="width=device-width, initial-scale=1.0">

<title>

➡ **Review:** *About Us/White Water Rafting Company*
Title must include the following: About Us and the rafting company name
✓ **<title>** exists within the **<head>** element..
✓ Title content meets basic content requirements.

Meta Description

➡ **Requires Content Review:** *We are committed to developing the community around us and 90% of our workers and guides are local to Southern .*
A meta description should be 50-160 characters, descriptive, and unique to the page.
✓ The meta description exists within the **<head>** element. (112 characters)

Meta Author

➡ **Requires Content Review:** *Solomon Itie|WDD130*
A meta author should be the student's name.
✓ **<meta name="author">** exists within the **<head>** element.

<body> Elements

<header>

✓ Document must contain a **<header>** element that is inside the **<body>** and appears before the **<main>** element.

<nav>

✓ Document must contain exactly two **<nav>** elements: one inside the **<header>** and one inside the **<footer>**.

<main>

✓ Document must contain a single **<main>** element that is inside the **<body>** and is between the **<header>** element and the **<footer>** element.

<footer>

✓ Document must contain a single **<footer>** element that is inside the **<body>** and appears after the **<main>** element.

Images

All image files must be ✓ correctly referenced, ✓ be optimized (<= 125 kB), ✓ have alt attribute.

✓ Found 6 **** elements (minimum 5).

File Reference	Size	Alt Text
✓ images/z-splash.png	✓ 38 kB	"Logo" ➡ Review if too short
✓ images/rafting155_1024.jpg	✓ 122 kB	"hero Image" ➡ Review if it is descriptive enough
✓ images/rafting29_6000.jpg	✓ 52 kB	✓ "Happy Employee"
✓ images/facebook.svg	✓ 1 kB	"Facebook" ➡ Review if too short
✓ images/instagram.svg	✓ 1 kB	"instagram" ➡ Review if too short
✓ images/linkedin.svg	✓ 0 kB	"Linkedin" ➡ Review if too short

header

✓ The **<header>** element must contain an **** element.

nav <a> links

✓ The **<nav>** element should contain exactly four **<a>** elements in order:
Home
About Us
Trips
Contact Us.

hero <div>

✓ The **<main>** element must contain a **<div>** element with class **hero**.

hero

✓ The **<div class="hero">** element must contain an **** element.

<h1>

➡ **Requires Content Review:** *White Water Rafting Company*
Document must contain a single **<h1>** element inside the **<div class="hero">** within the **<main>** element whose content includes the name of the rafting company.

hero <article>

✓ The **<div class="hero">** must contain a single **<article>** element that includes an **** element.

main <section> elements

✓ The **<main>** element must contain exactly two **<section>** elements. The first section must contain an **<h2>** with text "History" and a **<p>**. The second section must contain an **<h2>** with text "Adventure Awaits You!".

footer <p>

➡ **Requires Content Review:** *©2026 🌿 White Water Rafting Company 🌿 Solomon Itie*
The **<footer>** element must contain a single **<p>** element that includes:
✓ A copyright symbol (©)
✓ The current year (2026)
The rafting company name (requires manual review)
The student's name (requires manual review)

footer <nav>

✓ The **<footer>** element must contain a **<nav>** element with class **socialmedia** that includes exactly 3 **<a>** elements and each **<a>** element must contain an **** element.
✓ Footer **<nav>** contains 3 **<a>** elements each with an ****. The structure still needs to be reviewed for correctness of links and images.

CSS

CSS Files

The following CSS files were referenced in the HTML:
• styles/rafting.css

Required CSS File

✓ Expected href: **href="styles/rafting.css"**
Link Found: **<link rel="stylesheet" href="styles/rafting.css">**
File was reachable

Google Fonts API

✓ Google Fonts API (fonts.googleapis.com) must **NOT** be used for this assignment.
✓ Google Fonts API is not used (as required).

Inline Styles

✓ All CSS must be in external stylesheet files.
Inline styles using the **style** attribute are **not** allowed.
✓ No inline styles found.

Embedded Styles

✓ Embedded styles using **<style>** tags are **not** allowed.
✓ No embedded **<style>** tags found.

CSS Frameworks

✓ CSS frameworks or utility libraries (Bootstrap, Tailwind, Foundation, etc.) are **not permitted** for this course. All styling must be custom CSS.
✓ No CSS frameworks or framework use detected.

Icon Libraries

✓ Icon libraries (Font Awesome, Material Icons, Ionicons, etc.) are **not permitted** for this course.
✓ No icon libraries or icon library use detected.

!important

✓ The use of **!important** in CSS is **not allowed**.
Use proper specificity and cascading to achieve desired styles.
✓ No use of **!important** found in CSS...

W3C CSS Validation

✓ No CSS validation errors were found. Use the link below to check for warnings or other useful information.
... ⚠ Warnings Found: 1 ...
[CSS Validation Service Report on jigsaw.w3.org](https://jigsaw.w3.org/css-validator/)
Parse Errors due to a modern nested CSS structure can be ignored.
Warnings about the use of CSS Variables can be ignored.

CSS Rules

Hero Overlay Positioning

✓ The **.hero** container must have **position: relative**.
The **.hero h1** (or **h1**) and **.hero article** child elements must have **position: absolute** to appear on top of the **.hero img**.
✓ **.hero** container is **position: relative**, and both **.hero h1** and **.hero article** are **position: absolute** to overlay the image.

Article Image Float

✓ The image inside **.hero article** must have **float: right** to position it to the right side of the article text.
✓ **.hero article img** is floated to the right.

Social Media Links

✓ The **.socialmedia a** selector (or **nav a / footer a**) should have **text-decoration: none** to remove underlines from social media links.
✓ **.socialmedia a** has **text-decoration: none** to remove underlines from links.

CSS Variables in :root

✓ CSS variables should be defined in the **:root** selector (e.g., **--primary-color, --accent-color**) and used in the stylesheet with **var(--variable-name)**.
Defined Variables:
--primary-color: #055a05;
--accent1-color: #264653;
--body-font: Arial, Helvetica, sans-serif;
✓ Found 3 CSS variables in **:root**, all are used with **var()**.

Universal Selector Reset

✓ The CSS should include a universal selector reset like:
*** { margin: 0; padding: 0; box-sizing: border-box; }**
✓ Found a universal selector reset with **margin: 0, padding: 0, and box-sizing: border-box**.

Tip: It's common to include ***::before** and ***::after** in the reset, e.g. *****, ***::before**, ***::after { box-sizing: border-box; }**.
